

#### ABOUT STEVE PARKERS LTD

Steve Parkers Ltd was established in 1982 in a nature reserve in Rochdale, by Steve Parker and the late Sam Parker, after almost a decade of running Land Rovers and then racing and trialling Land Rovers for a hobby.

The company began by selling ex-MoD Series Land Rovers, and then quickly moved onto engine conversions to replace the slow underpowered standard engines in the series Land Rovers and later diversified into the wide range of services offered today.

Over the years we have bought a forward control ambulance and converted it to a diesel engine power steering camper van to travel around the world on behalf of a customer. Exported various land Rovers around the world. Re-chassised Series Land Rovers, Defenders and even a Discovery 2. We have also pioneered many parts to make life better for the Land Rover and its owners, eg, diff pans, swivel gaiters, oil feeders, Ford V6 engine conversions, Peugeot Diesel conversions, 200Tdi Discovery conversions to name but a few. Many of which have been sold all over the world.

Our large parts shop stocks genuine parts, quality replacement parts and accessories for all models of Land Rover. Our principal is that the cheapest is not always best. We offer advice to our regular customers and also try to supply all the parts needed to do a particular job rather than just the basics, as no-one wants to be missing a part when everyone is closed.

We specialise in Land Rover servicing, particularly with all models of Land Rover Discovery, Defender, Freelander, Evoque & Range Rover. Using the service schedules set out by Land Rover, we have added extra checks and lubrication of our own, which we feel the vehicles need when they have a bit more mileage on them. We also follow the good garage scheme schedules. This is a proper old-fashioned service. Our aim is to look after our customer's vehicle so that they have trouble free motoring between servicing. We advise on any work required in the future if it's in the short term or long term ie. next service, or for MOT time.

If required, we can take the vehicles for MoT testing as well. We also carry out general repairs, cam belt renewals, clutch renewals, winter or summer service checks, brake overhauls etc. We provide new low cost hire cars for convenience whilst your Land Rover or Range Rover is in our workshop being attended to. We also send out or text Service Reminders and MoT Reminders. We also have the latest "Autologic" testbook for diagnostics of the computer controlled parts of newer Land Rover Discovery, Defender, Freelander & Range Rovers. We also use a help desk support where garages pool problems and their answers to help with the modern day use of onboard computers on these vehicles. The mechanics have also been on training courses for these vehicles and everyday common fault finding.
